

SHREE BALAJI ROLLING MILLS PRIVATE LIMITED

Company Overview

Business Name: Shree Balaji Rolling Mills Private Limited

Factory Location: Bhiwari, Haryana

Business Location: Delhi NCR

Industry: Steel Manufacturing

Current Business: Manufacturing and sale of structural steel products catering to industrial, construction, and infrastructure applications.

Expansion Initiative: Commissioning of a new manufacturing facility focused on TMT bars, enabling the company to participate in one of India's fastest-growing steel segments.

Business Model

Shree Balaji Rolling Mills is a steel manufacturing company currently engaged in the production and sale of structural steel products serving construction, industrial, and infrastructure customers across Northern India.

The company generates revenue through:

- Manufacturing and sale of structural steel products
- Supply to distributors, dealers, fabricators, contractors, and industrial customers
- Long-standing relationships with regional construction and infrastructure participants

To capitalize on growing infrastructure and housing demand in India, the company is undertaking a transformational expansion into TMT bar manufacturing through a new facility that will significantly increase production capacity and market reach.

Company History

The company commenced operations in FY18 and has established a strong operating track record over the last several years. Revenue has grown from approximately ₹18 crore in FY18 to over ₹200 crore in FY26, demonstrating consistent execution and market acceptance.

Financial Performance

Financial Year Revenue (₹ Cr)

FY25	242.33
FY26	203.03

Source: Company Financial Statements

Manufacturing Platform

Existing Operations

- Structural Steel Manufacturing
- Installed Capacity: 36,000 TPA
- Production Capacity: 3,000 MT per month

New Expansion Project

- TMT Bar Manufacturing Facility
- Additional Capacity: 144,000 TPA
- Production Capacity: 12,000 MT per month

Total Capacity Post Expansion

- 180,000 TPA

The expansion represents a fourfold increase in manufacturing capacity and positions the company to evolve from a regional structural steel manufacturer into a scaled long-steel and TMT products platform.

Growth Outlook

The new TMT facility is expected to substantially increase operating scale and diversify the company's product portfolio.

Financial Year Projected Revenue (₹ Cr)

FY28	812
FY29	903
FY30	1,006

Management expects the company to evolve into a ₹1,000+ crore revenue platform following stabilization and ramp-up of the new manufacturing facility.

Investment Highlights

- Proven operating history and manufacturing expertise
- Established customer relationships across Northern India
- Transition from structural steel manufacturing to a diversified steel products platform
- Large-scale entry into the high-demand TMT bar segment
- Significant capacity expansion already undertaken
- Revenue visibility toward ₹1,000+ crore scale
- Conservative leverage profile
- Future renewable energy integration through captive solar power
- Strong operating leverage potential as utilization increases
